IP Fax

Mission-critical Communications Made Easy

As you modernize your network, one question that's often left until the end of the project is, what about fax? The fact is, fax is still a much-used mode of communication for many industries. If you haven't made the switch to an IP-based solution yet, this change may soon become absolutely necessary, as legacy technologies like POTS and PRIs are discontinued.

Cloudli's secure, reliable and flexible IP fax solutions allow your organization to make the move quickly and easily, and virtualize your operations without any disruptions. Additional encryption is also available to meet stringent security and privacy requirements.

Why Cloudli IP Fax?

Flexible options
Whether you have high-volume fax needs with your own fax server, or only need to fax occasionally, Cloudli has real-time and virtual options available.

High deliverability
Cloudli's high-quality, carrier-grade fax network is specially architected to minimize packet loss, jitter and delay. The result? Faxes are delivered reliably and securely.

Compliance
Cloudli's T.38 IP fax solution offers optional, patented AES (Advanced Encryption Standard) encryption, plus real-time transmission to eliminate any data intermediaries.

IP Fax Service Options

Virtual Fax

If you want your users to have the ability to send and receive fax via email, Virtual Fax is the answer. The best part? Virtual Fax doesn't need any special hardware or devices, making fax available to users on-the-go, working remotely, or in the office.

Fax ATA (Analog Telephone Adapter)

Maximize the lifespan of your multi-function and dedicated walk-up fax machines with Fax ATA. Cloudli's Fax ATA solutions allow you to connect the legacy interfaces of these devices to IP, maximizing the return on investment on your existing hardware while reducing fax costs. For security and compliance-conscious organizations, optional, plug-and-play AES encryption is available.

T.38 Fax SIP Trunks

If your organization maintains its own fax server, Cloudli's T.38 Fax SIP trunks are the way. High deliverability, secure transmission and optional AES encryption, supported by Cloudli's fax expertise, ensures that even the most complex requirements and rigorous compliance prerequisites are met.
